I finally rolled a torrent of the historic [IPFS-search](#) OpenSearch archive. Context: I am the founder and inventor of the now-defunct uncensored and unbiased Open Source search engine for [IPFS](#).

Index snapshots 2008-2023 totalling 22 TB. Please, if you can, help preserve this historic archive by downloading (part of) the torrent! Torrent: <https://lnkd.in/dTruGRew>

Reach out in the comments below if you're helping out - unfortunately I will not be able to keep this archive on my private infrastructure much longer. (I need it for training data towards the development of my new endeavour, [Treescape](#).)

Please, if you can, start downloading this, even partially. Every 1 TB will hugely help transfer speeds!

As it stands, it's coming through a 100 MBit pipe which will take about a week to transfer. ...more
